## Building Process for Custom Built PCs

**Process:** Are you in the market for a gaming or custom built desktop that is tailored to your needs? We can build a complete PC for you, whether or not you're using it for office work or high end gaming. To start the process, please get in touch with us. We want to ensure that we do not charge you for a component that you do not need. As such, when you call us, we may ask you a few questions such as "How are you using the PC?", "How long do you expect this PC to last?". These questions will help us determine the right components for your PC.

We will send you a detailed quote that lists all components and pricing. From there, it is completely up to you how you'd like to go about purchasing. Most of our clients choose to purchase the parts on their own, and then have the parts shipped to our business. Once all parts are received, the PC is built with great attention to detail and aesthetics.

You can expect a PC that will have

- Organized Wiring
- Genuine Copy of Windows
- All accessories given to you upon completion
- RGB if desired
- Full technical and hardware support. See details below

**Pricing:** Please let us know if there is a budget that you'd like us to be aware of before quoting. We only use the highest components available. This ensures a great user experience with the PC, reliability and longevity. These components may not be the cheapest available, but will provide you with the best experience and minimizes the chance of a repair down the line after ownership. All parts that we recommend are from reputable manufactures and provide great quality and craftsmanship. Most of our PCs start at a price of \$1,000 and go up from there. Additionally, there is a labor charge of \$75.00 per hour for the building of PC

**Warranty:** All parts are warrantied through the manufactures warranty. Some components may be warrantied longer than others. As such, when we quote your PC, we will include all warranty information prior to purchase of parts. Additionally, you will get free remote support over the course of the first year of ownership should something go wrong with Windows or if you simply have a quick question.
